

CI

## Leadership Transition at Microsoft

In addition to Strategy,  
Succession Planning <sup>lends itself to</sup> → HR & Leadership classes

Avoid scope creep (this is growing quite large  
for a CI)

If something doesn't directly impact on the decision,  
it might be best left-out.

Include Bill Gates info.

as Embryo case <sup>this</sup> falls behind the CI schedule  
or consider case path which extends timeline.

---

TN. For class: what criteria  
would be relevant  
consider vision, for this decision?

Must stay stand-alone sufficient.

Re-organize the L.O.'s  
why ~~try~~ using triple barrel on Q2?  
map each L.O. to each Q.

Narrow Questions 1 & 2

~~Recommend to professors what <sup>decision</sup> would be  
preferred, rather than what was chosen.~~  
make suggestions on how professors handle this  
rather than simply stating what  
decisions were made.
